

Safety Advisory Committee Representative

The Division Director nominates an ATAP researcher who can effectively represent the Division to the Laboratory Director for appointment to the **Safety Advisory Committee** (SAC). There are no specific qualifications for SAC members in terms of their position, experience, and training at the Laboratory. The SAC Representative is expected to:

- Possess an understanding of Integrated Safety Management.
- Communicate regularly with senior division management and other division personnel as needed.
- Possess communication skills to comment on, make suggestions or recommendations for, revise, advise senior management on, and influence the Laboratory's approaches, methods, documents, and practices to continuously improve the Laboratory's safety programs.
- Develop an understanding of the LBNL ES&H Manual and related documents, and the processes for revising these documents.
- Participate actively in SAC meetings, subcommittees, and peer review activities.
